

WATCH COMPRISING A SOLAR TIME DISPLAY

ABSTRACT

A watch comprising civil time display means (12, 16), solar time display means (13, 18) and means of correction (24, 34, 36) of the displays. In this watch, the means of correction are arranged in such a way as to allow the relative desynchronization of the civil time and solar time display means. It furthermore comprises means for displaying this desynchronization (20, 22).
